Dayton VA Medical Center announces site of new Springfield CBOC

DAYTON, Ohio — The Dayton VA Medical Center is pleased to announce the selection of the new site for the Springfield Community Based Outpatient Clinic (CBOC).

The new site at 1620 N. Limestone St. Springfield, Ohio, 45503, is projected to open following new construction in 2019 and will replace the existing clinic at 512 South Burnett Rd.

The new clinic will offer significantly more room than the existing clinic: 12,500 square feet versus 11,887 square feet, an increase of 613 square feet. The new site -- conveniently just north of downtown Springfield -- the new clinic will be designed to best serve the needs of the Veterans. This move will improve access to care, efficiency of facility operations, a state-of-the-art infrastructure layout, parking, and care coordination between all services.

The relocation was necessary to serve the growing Veteran population in Springfield. The Springfield CBOC served more than 3,600 Veterans in the past 12 months, with more than 21,000 outpatient visits.

The site at 512 South Burnett Rd. will continue to remain open and serve Veterans for all existing services until the new site is ready to open in 2019. At that time, Veterans' medical information and appointment schedules will be seamlessly transferred to the new CBOC.
